

DEEP BLUE PROJECT OVERVIEW

The DEEP BLUE project aims at developing skills and building capacities throughout enhancing geopolitical dialogue and international scientific cooperation (Science Diplomacy) in the Western Mediterranean Region. By doing this, it develops education and training paths aiming at creating an advanced shared knowledge and common methodological ground on the key sectors of Blue Economy in the Mediterranean basin while fostering North-South and South-South cooperation among public and private stakeholders.

INTRODUCING THE PARTNERSHIP

The successful operation of these unique trainings would set a precedent for further collaborations between research and higher education institutions and private sector of the countries of the Mediterranean Region in view of developing a sustainable Blue Economy and to fulfil education and skills gaps in both shores of the Mediterranean. The partners of the projects are the coordinator, the National Institute of Oceanography and Applied Geophysics, OGS (Italy); the University of Sfax - Department of Life Sciences, US (Tunisia); the Polytechnic University of Madrid - Centre For Support For Technological Innovation, UPM CAIT (Spain) and the Higher Institute of Fishing Technologies and Aquaculture, ISPAB (Tunisia). Our main supporter is officially the shipbuilding company “Fincantieri.

DEEP BLUE WEB PORTAL

As soon as the project was launched on January 1st 2019, our communication team has developed the DEEP BLUE web portal in order to disseminate the project objectives and reach all the future applicants for the planned mobility and training activities. Do not hesitate to visit the page <http://bluegrowth.inogs.it/deep-blue> and you will find all the information and the tools needed in order to stay up-to-date and read news about Blue Growth and DEEP BLUE project.

For further information, contact us: deepblue@inogs.it or visit <http://bluegrowth.inogs.it/deep-blue>
